

Meeting February 2013

Meeting brought to order by Rod approx 7:00pm at EWEB

Treasures report By Bill Schneider: As of Dec 2012 club had \$4051.11. Club collected dues of \$1350.00 with a deduction of \$50 for corporate license and \$6.50 for sponsor sign. With these additions and deductions the total for February 2013 is \$5344.35. This was approved by all members present.

Old Business: Rod still pushing Jack for electricity. Club discussed and set dates for 2013 lineup.

May 11th - Grange swap meet

June 22nd - Fun Fly

July 27th - Blackberry Fest

August 24th - Paintball/Fun Fly

New Business: Rod suggested that the club host an indoor swap meet at the Irving Grange. If all goes as planned, this should net the club some decent profit. Bill S. has a possible food vendor that would be willing to set up and share some of its profits with the club as well. After some discussion, club decided to move on the idea and set the date for May 11th. Rod will assist Jim C. on Flyer details. More on this later. Weekend work group accomplished a great deal with brush clearing, fertilizing and weed killing. Thanks to all that helped. Check out pics on website.

Club agreed to pay for and install approximately 250' of new fence along 99. Work party will start 8am Saturday 2/23. Bill will pick up materials. Rod brought in new club and sponsor signs. They look amazing and will also be installed at the Saturday work party. Bill Hastings brought to light that our rodent problem has returned due to Dave's absence. Jim will research product that the Eugene Prop

Spinners use. The remainder of the evening was a great schooling session from John Farkas. He brought in 4 different Helicopters and talked about how the control surfaces work and the different characteristics of them all. He also shared some of the history and advancements of Gyros and some of the new stabilization products out there. With some of these new advancements it should make learning to tame one of these birds a bit easier. Some of the systems will work with fixed wing as well. Thanks to John for a great class. He finished with a short demo with a small coaxial heli. Very cool.

Meeting Adjourned approximately 9pm

Sincerely John Risbrough
