

FT EZ ID \$99.99

FT EZ ID is FAA-compliant remote ID designed and made in the US.

A lightweight solution for RC and drone pilots, with integrated GPS and Bluetooth.

Here is the website for the remote ID:

<https://store.flitetest.com/ft-ez-id/>

Please note: This comes with 3 pigtails but not the case.

Flite Test is also a great resource for electric RC aircraft - their foam board airplanes are easy to build and fly great.

Cheers, David
